# anti - age

An antioxidant formula which reduces the symptoms of aging

## Discover the secrets of defying the symptoms of aging

**anti age** is a nutritional supplement developed to fight the symptoms of aging and to help maintain a healthy, vibrant and energetic life. The garlic oil and whey protein based formulation essentially detoxifies the harmful free radicals and repairs cell by providing nutrients at cellular level.

**Active Ingredients.** Garlic oil, Whey protein

All ingredients in this supplement are classified as GRAS (Generally Recognized As Safe) by FDA for food supplements.

**Symptoms of aging** are the result of cell damage by free radicals which are produced in the normal aging process, by environmental toxins, pollutants, etc. Glutathione prevents damage to cell structures and neutralizes these free radicals. Cysteine, an important amino acid for glutathione synthesis, is often in short supply due to its instability in heat. Our daily food thus cannot provide enough cysteine which limits the availability of glutathione in our body.

**Health benefits** of **anti-age** lies in the fact that the garlic oil and whey protein synergistically provides a rich source of cysteine and increases

(both directly and indirectly) the synthesis of glutathione in the body.

As a result, **anti age** effectively:

- Prevents symptoms of premature aging
- Nutritionally extends cell life and helps retain a younger appearance
- Resists cell and organ damage due to free radicals
- Helps optimize body's biochemical balance
- Provides cellular defense against environmental pollutants and toxins
- Provides a rich source of amino acids (especially cysteine)

**Recommended dose:** 3 capsules per day with meals or as advised by the physician; Not recommended for children under 12; Patients having gastritis should consult with physicians before intake.

The product is patented and manufactured under license from Allium Vitalis, Berkeley, CA, USA.

US Patent no: US8217084, US8222299
