

# ARSENICURE

Nutritional Support for Combating Arsenicosis

More than 137 million people in the world are being unknowingly exposed to unsafe levels of arsenic in their drinking water. Widespread Arsenic contamination of ground water has led to massive epidemic of arsenic poisoning in Bangladesh. Arsenic have been specified as a known human carcinogen causing skin and lung, kidney and bladder cancer.

Viola Vitalis, Bangladesh together with Allium Vitalis in Berkeley, USA has developed nutrient based formulation for arsenicosis management: **Arsenicure** for treatment of external symptoms and ARS Detox, a capsule formulation to neutralize the accumulated arsenic inside the body.

**Purpose:** Arsenicosis is defined as a chronic health condition arising from prolonged ingestion of arsenic above the safe dose for at least six months, usually manifested by characteristic skin lesions of melanosis and keratosis, occurring with or without the involvement of internal organs.

After absorption, inorganic arsenic accumulates in the liver, spleen, kidneys, lungs, and gastrointestinal tract. It is than rapidly cleared from these sites but leaves a residue in keratin-rich tissues such as skin, hair, and nails. Removal of arsenic requires biothiol glutathione that are depleted in people exposed to arsenic.

**Arsenicure** skin lotion combines the function of arsenic detoxification, antioxidant, anti-inflammatory, and anti-microbial effects of garlic oil. It assists in the biosynthesis of glutathione, thereby supporting the natural pathways of arsenic detoxification, elimination of inflammation and prevention of skin damage.

The Aloe Vera - Lanolin base in the lotion opens up the skin pore and aids in receiving other nutrients, leaving the skin smooth and healthy.

**Active Ingredients:** Garlic Oil, Aloe Vera and Lanolin.

**Recommended Dosage:** 2 or 3 times daily

**Indication:** For external purpose only.

**Storage:** Store in a cool and dry place, keep out of reach of children.

**Side Effects:** There are no known adverse effects.

Product patented and manufactured under license from Allium Vitalis, Berkeley, CA, USA. US Patent No. are: 7678833 B2; 8217084 B2 and 8222299 B2.
